

Local Children Open New Look Co-op After £100,000 Revamp

Local children took on star status when they performed the ribbon cutting ceremony to officially launch the new look Co-op store in Silloth, which has been transformed with a £100,000 revamp. The pupils of Silloth Primary School were presented with a donation of £200 for school funds by store manager David Nicholson to mark

the occasion. "As a community retailer it is appropriate that we involve the community in our special events and we are delighted that our local school is playing a central role in the re launch of our store," said

David.

The Co-op has been converted to the retailer's latest Welcome format and is transformed with modern decor, a more shopper friendly layout, new fixtures and fittings, and a wider choice of

goods.

"The Co-op provides a much valued service in the neighbourhood and this investment in the area endorses our commitment to serving the community with the best in modern shopping

facilities" added David.

The store's emphasis is on fresh foods with the range increasing by 25%. Chilled beers and wines and a greater selection of convenience meals are also available. As the leading supermarket

supporter of Fairtrade, the Co-op's Fairtrade products feature while the store also carries the consumer-owned retailer's own health and beauty range with products that are not tested on animals. "We

are delighted we can now provide our many loyal shoppers with a smart, modern store, comprehensive range and a much enhanced service which will better meet the needs of the community," said David.

WHAT OUR CUSTOMERS SAY

"From my initial phonecall to him leaving, the service was superb. He turned up on time to price the job, had all the specialist gear – a very professional service."

Mr J Harker

"Our conservatory has been up for three years and it did have a little algae on top. Michael did a lovely job and after you've had yours done you notice other peoples."

Mrs Renny

A complete affordable exterior conservatory cleaning service using specialist access and cleaning equipment that will leave your conservatory looking like new.

A CONSERVATORY is an excellent investment, increasing the value of a property far above its cost and when looked after properly, it will last for years. But if it isn't cleaned properly, there could be problems - and that's where ConserVClean comes in. Michael McFarlane could not find anyone to clean his own conservatory, so he started up ConserVClean which has been growing ever since.

Most work has come via customer recommendations. The company is fully insured and uses specialist cleaning and roof access equipment. The system can extend the life of a conservatory and also helps to prevent potential leaks and algae growth.

"Conservatories cost on average about the same price as a family car," says Michael. "Proud car owners wash and wax their vehicles and spend hundreds of pounds a year maintaining them. But you only keep a car two or three years, and you lose money on it."

"A conservatory costs thousands too, but it will last a lot longer than a car, and it's an excellent investment if it is properly maintained. It's only common sense to keep it properly cleaned."

"Wet weather and bird muck can contribute to the decay of a conservatory. If conservatories are not maintained, they become dirty and green algae forms possibly feeding on the rubber seals," says Michael. "Algae can grow within key joints which if left untreated may leak and the value of the conservatory may fall unless expensive repairs are performed. This need not happen if the conservatory is regularly cleaned." Powerwashers and normal cleaning brushes can damage seals and scratch polycarbonate roofs, making good homes for dirt. For a fraction of the cost of maintaining a car, ConserVClean will increase the looks, reduce

problems, prolong the life and value of your conservatory.

Trying to sell your house? Make your conservatory immaculate.

Let in more light! Even a thin layer of dirt on the roof can greatly diminish light filtration.

Prevent problems. Cleaned once or twice a year, your conservatory will be kept in good condition and you will get maximum benefit from it.

No more unsightly green moss on your lovely UPVC frame or grime on your difficult to reach roof.
